Forecast for Wednesday 12 Jan 2022

Weather: Clear skies to start with a frost and patchy fog possible in the valleys. Any valley fog will slowly clear, otherwise a dry and mostly sunny day. A mostly clear evening with a frost and a few fog patches developing.

Chance of cloud free mountain/hill tops above 600m: 95%.

Visibility: Mostly excellent at height with clear views of distant hills. Patchy fog in the valleys giving very poor visibility with nearby landmarks obscured, will be slow to clear during the morning, then developing again in the evening.

Meteorologist's View

A fine winter's day for being in the hills but note there will be areas of ice at first after an overnight frost.

Forecast for Thursday 13 Jan 2022

Weather: Patchy mist and fog will be slow to clear from some valleys. Otherwise another dry and bright day with sunny spells. Some mist and fog will form again through the evening.

Maximum wind: South or Southwest 10-15mph.

Chance of cloud free mountain/hill tops above 600m: 80%.

Visibility: Mainly very good at height. Patchy fog in the valleys will be slow to clear and some may develop on higher slopes during the evening.

Temperature: **Valleys:** Minus 1 Celsius rising to 6 or 7 Celsius, but around 2 Celsius where fog lingers.

At 600m: 3 or 4 Celsius.

Freezing level: Just above summits. Frost in the valleys early and late.
